

N5683T

1964 CESSNA

172 E 210 HP Project*

\$25,500

*Engine and prop shown in picture has been removed and is not included with airframe sale, aircraft needs firewall forward package

Description

Nice Skyhawk project in need of a firewall forward package. This aircraft previously had a IO360 installed on a field approval that was revoked. The previous firewall forward package has been removed, sold and is not available. This Skyhawk has great paint, interior and glass. No airframe damage, not a crash! Pick your favorite firewall forward package to install and have a very nice low time Skyhawk! FBO is willing to remove wings and assist with loading on your trailer for only \$600.

Detailed Specs
